# In House Units

## Creating In House Units:

“Inventory”, “In House Units”, “+In House Units”

After typing in the name of the unit, set up a conversion. Select the “+” button to add more conversions

The screenshot shows the 'InHouse units' form. The 'Name' field contains 'Bottles'. The 'Measure Type' is set to 'Volume'. The 'Conversions' section shows a conversion of '1 US pint'. There are 'Close' and 'Update' buttons at the bottom.

**These conversions need to be linked in order to use for the Inventory Item**

The screenshot shows the 'InHouse units' form with 'Liter' as the unit name and 'Volume' as the measure type. The 'Conversions' section lists various units with their corresponding conversion factors:

Conversion	Factor
1000	
Milli liter	0.2641721769
US gallon	1.0566881491
US quart	2.113785315
US pint	4.2267570629
US cup	33.8140565033
US ounce	67.6278843293
